

# Robert Varela

Front-End Engineer

Austin, TX | 512.516.9901 | [rvarela@utexas.edu](mailto:rvarela@utexas.edu)

## Experience

### Front-End Engineer

*April 2021 - Present*

#### ShipStation

- » Working within a cross-functional team to enhance and add functionality to ShipStation software platform.

### Lead Front-End Engineer

*March 2022 - Present*

#### Metav3rse

- » Building the MV3 NFT access pass website with technologies such as react, redux, react router, ethers, and MetaMask.

### Front-End Engineer

*Dec 2019 - April 2021*

#### Ping Identity

- » Designed and built a client facing UI for a high-performance directory. Particularly involved in flexible forms with multi-value entries, report tables with download capabilities, and robust UI error handling.

### Front-End Engineer

*Apr 2019 - Nov 2019*

#### Wellsmith

- » Worked with designers, product owners, and backend developers in an agile environment to turn ideas and mockups into a production-ready web application.
- » Made the code base more readable by updating the state management container from redux to apollo (GraphQL). Also, built the first end to end test suite to help with regression testing.

### Front-End Developer

*Nov 2017 - Apr 2019*

#### Arrive Logistics

- » Built internal web based tools which helped the company stay on track to double its revenue and continue to move up in the top 50 brokerage firms.
